SUMMARY

I am a quick learner and have done some mini projects on machine learning & web development. Hope to get more opportunities for gathering more knowledge and experience as a creative thinker to adapt in software development.

WORK EXPERIENCE

Konnectix Technologies Pvt. Ltd. | Website Developer Intern Nov 2024 - Dec 2024

- Designed, developed, and tested dynamic website components for diverse clients and business needs, ensuring optimal functionality and performance.
- Collaborated with cross-functional teams to create user-friendly, responsive, and high-performance web solutions.
- Completed a one-month internship, contributing to website development projects by enhancing front-end and back-end functionalities.

PROJECTS

Full stack Realstate Website

Developed a full-stack real estate website with a dynamic property listing system using PHP, MySQL, and XAMPP. Integrated a professional admin panel, allowing client to manage and update page content easily. Designed a responsive and user-friendly interface with secure authentication and property management features.

Spam Email Classifier

Developed an email classifier using Python and machine learning, leveraging NLP and classification algorithms to categorize emails (spam, promotions, personal). Implemented data preprocessing, feature extraction, and model training with scikit-learn and pandas.

Personal Portfolio

Developed and maintained a personal portfolio showcasing web development projects.
